GoldExpertPro EA - User Guide

Professional Gold Trading Expert Advisor

1. Introduction

GoldExpertPro EA is an automated trading solution designed for gold trading on MetaTrader 4 and MetaTrader 5 platforms.

2. Installation Guide

Step 1: Download the GoldExpertPro EA files.

Step 2: Open MetaTrader 4/5.

Step 3: Go to File > Open Data Folder.

Step 4: Copy EA files into the Experts folder.

Step 5: Restart MetaTrader platform.

3. Attach EA to Chart

- Open XAUUSD chart.

- Find GoldExpertPro EA in Navigator.

- Drag the EA onto the chart.

- Enable Algo Trading / Auto Trading.

4. License Activation

- Enter your provided license key.

- Confirm activation.

- Wait for successful license verification.

5. Loading MT5 SET Files

- Open EA settings.

- Click Load.

- Select the required SET file according to your account balance.

- Apply settings.

Available preset balances:

1K to 20K account settings.

6. Recommended Setup

- Symbol: XAUUSD

- Platform: MetaTrader 4 / MetaTrader 5

- Use recommended risk settings.

- Monitor trading conditions.

7. Risk Management

Trading involves risk. Use proper account management and avoid excessive risk exposure.

8. Troubleshooting

EA not visible:

Check that files are placed in the correct Experts folder.

Auto Trading not working:

Enable Algo Trading and check platform permissions.

SET file issue:

Confirm the correct preset file is selected.
